

## Angeles Invests in Development of COVID-19 Testing

Angeles Participates in Series C Funding Round in Tech Leader, LetsGetChecked.

Angeles Investments is pleased to announce its participation in an oversubscribed \$71 million Series C funding round for LetsGetChecked as a direct co-investment. LGC is an at-home health personal testing and insights company offering a wide range of direct to consumer tests.

LetsGetChecked's latest funding round provides the company with capital to scale up efforts on COVID-19 testing capacity. The company will focus on getting tests to healthcare workers and essential business employees with the goal of launching an at-home test for the public soon.

Angeles seeks to invest in companies that not only present a compelling investment opportunity but also create a positive societal impact. LetsGetChecked checks both of these boxes, and Angeles is excited to support a company that is at the forefront of the fight against the global pandemic.
